Event Services and Experiential Marketing

Solution Overview

Problem Solved

Automated access reviews and reporting, enabling compliance with TISAX.

Solution

EasyLife 365 Collaboration

Enabling Partner

Merkel IT GmbH

M365 Products

- Teams
- SharePoint
- Microsoft Groups

PENTA GmbH, a leader in event services and experiential marketing, needed to meet the stringent compliance requirements of TISAX to safeguard sensitive data and ensure secure access management across their Microsoft 365 environment.

Challenges

To comply with TISAX, PENTA required a robust system to effectively manage and audit access to sensitive data within their Microsoft 365 environment. With increasing demands for data confidentiality, integrity, and security, implementing strict access controls and performing regular access reviews became crucial for maintaining compliance.

Solution

TISAX (Trusted Information Security Assessment eXchange) requires stringent access controls and incident reporting processes to manage risks associated with critical data and infrastructure—similar to other regulations like NIS2 and ISO 27001.

In partnership with **Merkel IT**, PENTA adopted EasyLife 365 Collaboration to streamline access management and automate compliance processes:

Access Reviews: EasyLife 365 automated the process for regular reviews of user access, providing oversight on:

- Ownership and membership in teams.
- File sharing activities and permissions.
- Management of private channels.

This solution allowed PENTA's administrators to consistently align their access management practices with TISAX's high standards.

Automated Reporting: EasyLife 365 automatically tracked and recorded user activities within the Microsoft 365 environment, providing PENTA with detailed logs. This feature streamlined compliance reporting, allowing PENTA to demonstrate adherence to regulatory standards while reducing the effort and time required for manual audits.

PENTA GmbH Achieves TISAX Compliance with EasyLife 365 Access Reviews

Results

The implementation of EasyLife 365 Collaboration enabled PENTA to streamline access management and ensure compliance with TISAX as the security standards regulation. Automated workflows reduced manual oversight, minimized non-compliance risks, and enhanced data security. This automation allowed the IT team to focus on strategic initiatives, boosting efficiency and safeguarding sensitive data across their Microsoft 365 environment. Key outcomes include:

- **Enhanced Data Security:** By implementing regular, automated access reviews, PENTA minimized the risk of unauthorized access to sensitive information.
- **Improved Compliance:** EasyLife 365 Collaboration provided continuous alignment with TISAX, meeting audit requirements and establishing a strong cybersecurity posture.
- **Resource Optimization:** Automation reduced manual workload, allowing IT teams to allocate more time to strategic initiatives.

“With EasyLife 365, we streamlined our compliance processes and significantly enhanced our data security framework. Achieving TISAX compliance became a manageable task, thanks to the automated access review and reporting feature.”

Enea Ciaburri, CEO, PENTA GmbH
